

PROJECTION ARTWORKS SHOWROOM

Projection Artworks, specialists in digital experiences, re-opened its studio with never-been-seen-before display technology and brand-new content designed to leave audiences speechless that included London's first OLED showroom.

The showroom's Imagination Room features three 55EF5C Open Frame OLED displays in a curved formation, which gives viewers an insight into what they could achieve from the technology. The display is featured alongside other innovative technology including 'Vantablack' the darkest man-made substance known on earth, LED sculptures and data driven visualisation by collaborative artists.

KIT LIST

- 3 x 55EF5C Open Frame OLED displays
